

# LOGIFLEX

Why  
LOGITRANS?

logitrans.com

Ergonomically correct handle

Emergency stop on handle

Free lift by telescopic mast

Instant stop (fork stops quickly and precisely)

## Less sick days

The ergonomic design reduces sick days and gives happier employees.

## Higher efficiency and performance

The unique designed construction of the Logiflex models increases the efficiency in production, shipment area or stock.

The Logiflex has various options in one stacker whether you will handle EURO pallets, drums or material with a crane arm, boom or a platform.

All control buttons are located on the handle and ensure a high level of safety.

## Durability, lifetime

The Logiflex range has a long operating life. The special and logic construction with use of quality materials lowers maintenance costs. Will be tested before shipment.

## Flexibility

- Available as manual, semi electric and fully electric stacker.
- Different fork lengths and widths.
- Available with level control and remote control.
- Tailor-made solutions.
- Available in stainless version.
